Re: South Cavalcade RI/FS
1573-73

Dear Mr. Wright:

In response to the preliminary conclusions reached at the April 21, 1987 meeting with representatives of your staff, CDM, MRA, and Koppers, we are submitting a list of proposed off-site groundwater monitoring well locations which are delineated in the attached letter and map prepared by McBride-Ratcliff and Associates, Inc. Koppers solicits EPA assistance in obtaining access to the off-site property for drilling of the additional borings/monitoring wells.

In addition, this letter provides an opportunity to suggest that EPA and Koppers work jointly to provide compatible water level data of the two sites, North and South Cavalcade. The survey datum base should be the same for the two sites and measurement of water levels should be taken on the same day. The information will be useful for inclusion in both RI reports.

Should you have any questions, please contact us at your earliest convenience.

Sincerely,

A handwritten signature in cursive script that reads "Shannon K. Craig".

SUBJECT: Offsite Groundwater Monitoring Well Locations
South Cavalcade Site
Houston, Texas

In response to your request, we are submitting the following list of proposed offsite groundwater monitoring well locations. A total of four potential locations were identified during our meeting on April 21, 1987 with representatives of the EPA and CDM, and are presented on the attached maps.

Well Location Area

Description

A	Northwest
B	Southwest
C	Southeast
D	East

Property ownership for each well location area is listed on the attached table. Please call if you need any additional information.

Sincerely,

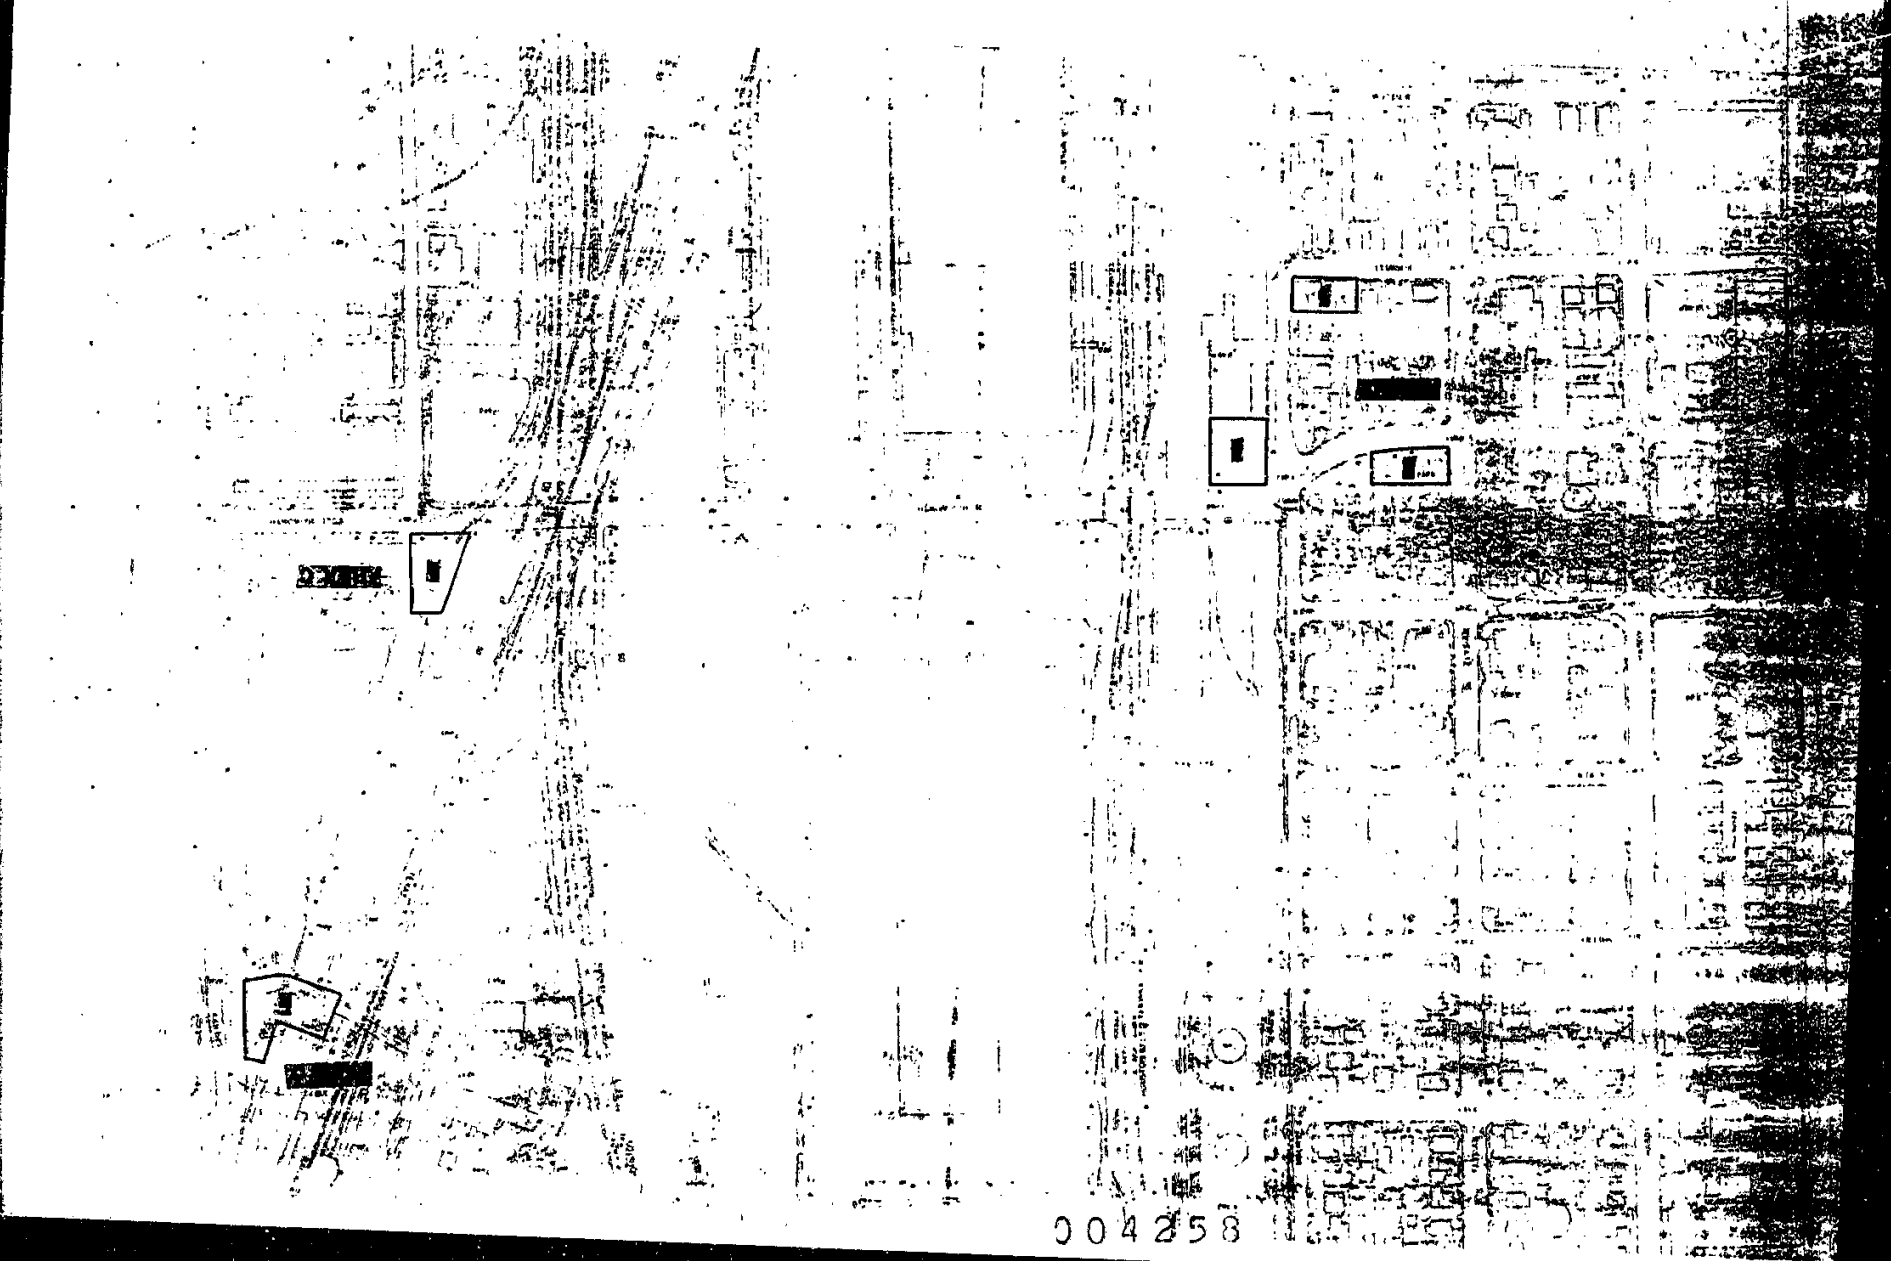

McBRIDE-RATCLIFF AND ASSOCIATES, INC.
